Journal of Non-Newtonian Fluid Mechanics, 51 (1994) 347–348
Elsevier Science B.V.

Contents of Vol. 51

Vol. 51, No. 1

Numerical simulation of non-isothermal extrudate swell at high extrusion rates
R.Y. Chang and W.L. Yang (Hsinchu, Taiwan) 1

Enhancement of the drainage of non-Newtonian liquid films by oscillation
J.A.Goshawk, N.D. Waters (Liverpool, UK), G.K. Rennie and E.J. Staples (Bebington, Wirral, UK) 21

An experimental and theoretical study of the squeeze-film deformation and flow of elasto-plastic fluids
M.J. Adams, B. Edmondson, D.G. Caughey and R. Yahya (Bebington, Wirral, UK)..... 61

Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres
J. Vorwerk and P.O. Brunn (Erlangen, Germany) 79

Short communication

Some comments on the surface-tension driven break-up (or the lack of it) of viscoelastic jets
M. Renardy (Blacksburg, VA, USA)..... 97

Calendar 109

Vol. 51, No. 2

White–Metzner models for rod climbing in A1
T.Y. Liao (Minneapolis, MN, USA), H.H. Hu (Philadelphia, PA, USA) and D.D. Joseph (Minneapolis, MN, USA)..... 111

The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning
S.W. Joo (Detroit, MI, USA)..... 125

Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem
F.P.T. Baaijens (Eindhoven, The Netherlands) 141

Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow
C. Pozrikidis (La Jolla, CA, USA)..... 161

A simple empirical model describing the steady state shear viscosity and its prediction of the first normal stress function in shear flow
Y. Seo (Seoul, South Korea)..... 179

The effect of fluid rheology on the elastic Taylor–Couette instability
R.G. Larson, S.J. Muller and E.S.G. Shaqfeh (Murray Hill, NJ, USA) 195

Short communications

A note on the viscoelastic instability of circular-Couette flow
M.R.E. Proctor (Cambridge, UK) 227

On a discontinuity capturing technique for Oldroyd-B fluids
E.O.A. Carew, P. Townsend and M.F. Webster (Swansea, UK) 231

On the elastic free energy of a linear viscoelastic fluid undergoing a fully developed viscometric flow
F. Doghieri (Bologna, Italy), R. Ghisellini (Ferrara, Italy) and G.C. Sarti (Bologna, Italy) . 239

Book review 241

Announcement 245

Calendar 247

Vol. 51, No. 3

Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method
T. Sato (Tokyo, Japan) and S.M. Richardson (London, UK) 249

Application of spectral elements to viscoelastic creeping flows
V. Van Kemenade and M.O. Deville (Louvain-la-Neuve, Belgium) 277

A solver for time-dependent viscoelastic fluid flows
F. Olsson (Stockholm, Sweden) 309
